

I have concerns regarding the introduction of expanding Low Power FM (LPFM). I have heard that these LPFM stations would take priority over our current FM translator service. I currently listen to one station (K-Love) which would be affected by this and it saddens me. K-Love has been an inspiration in my family's & my lives. With the positive music and positive words of encouragement we have grown to having this station "on" 24/7. We get news, and weather, and are kept updated on breaking news issues. My children's lives have changed and there is peace in my home. K-Love has become part of our daily life and its impact in our life is noticeable. We cannot afford to lose the signal in our community for K-Love to transmit & our community would suffer as well. More and more members in our community are tuning in to K-Love and then sharing the impact that this station has had on them. Some would be devastated. There are not many radio stations that broadcast positive messages and music in our area. Please let our community continue to be blessed by this FM station. We do not have many alternatives in North Dakota. Consequently, we need to hang on to the good things we have ....The things that build our communities positively. I have heard of stories where young people have changed their lives around just by listening to the contemporary positive music on K-Love. Some community members had no idea that contemporary music could sound so good and carry positive messages. Encouragement to treat people with respect, to respect our environment, and to help people in need are some of the messages I hear frequently on this station. I believe that the service provided by K-Love is in the public interest because of the positive impact it has made on many lives. Thank you for considering our need and may God bless you and help you with your decision.

Sincerely,  
Beth Krieger
